PLACE ACQUIRED - - - (BY SOURCE) 00/C NO. ORR NO. DAS NO. OCI NO. 25X1A DATE 5:STR. 3 Dec 53 NO. OF PAGES 2 NO. OF ENCLS. MD 784, OF THE U.S. CODE, AS AMENDED. ITS TRANSMISSION OF REVE BOWLESTED BY LAW, THE REPRODUCTION OF THIS REPORT IS PROMISETE SUPP. TO THIS IS UNEVALUATED INFORMATION REPORT NO. 25X1X The Managing Director of Kilembe Mines is D. C. Sharpstone, and the General Manager is A. E. Pugsley. 2. During the year, work at Kilembe Mine, Uganda, was executed at an accelerated pace and was directed primarily toward the preparation of the mine for production, and in providing surface facilities ancillary thereto. Surface construction included the erection of a brick and tile plant, lime kilns, general offices, 19 permanent European houses and 30 blocks of African quarters. Work was also started on a 1,500 kilowatt attand-by hydro-electric power plant, intended to provide necessary power during the construction period. 3. Diamond drilling of the Bukanguna shoving, located a mile to the west of present development, has established geological conditions identical to those at Kilembe. Preliminary results from widely spaced drill holes are considered most encouraging and have no proven the ore formation over a strike length of 2,100 ft. Drilling continues. 4. The total development work and dismond drill footage, that has been completed to the end of 1952, is as follows: 1,473 ft Main Houlages 36,430 Drifts and Crosscuts Reises 42,98; ft Total Development Footage 51,014 ft Surface Diamond Drilling Underground Dismond Drilling 40,607 91,051 ft Total Di mond Drilling U.S. Officials Only CONFIDENTIAL SECURITY INFORMATION DISTRIBUTION - STATE EV AIR 1 581 This report is for the use within the USA of the Intelligence components of the Departments or Agencies indicated above. It is not to be transmitted overseas without the concurrence of the originating office through the Assistant Director of the Office of Collection and Dissemination, CIA.

CONFIDENTIAL/SECURITY INFORMATION/US OFFICIALS ONLY Ore reserves as of January 1953, are reported by as 🦟 25X1X Class of Ore Tons % Copper % Cobalt Proven Ore 4,804,000 2.10 0.17 Indicated Ore (Probable) 5,987,000 2.08 0.18 Proven Plus Indicated Ore 10,791,000 0.18 Inferred Cre 3,964,000 1.44 0.19 Total Ore 14,755,000 1.92 6. The following possibilities for additional ore at Kilembe - "It seems likely that many million additional tons of ore may be found at greater depth and along the strike of the ore to the westward." 7. The original plans for production have been modified with a view to an annual treatment of 500 thousand tons from which it is expected that approximately 18 million 1bs of copper and 900 thousand 1bs of cobalt would be produced. Plans to arrange the necessary financing to put the property into production on this scale are proceeding with encouragement.
